

App Tracking Transparency or ATT (IDFA)

This asset literally helps you show the ATT popup with one line of code.

Step 1 (Call IDFA Popup):

To Request a popup on iOS 14+ devices call

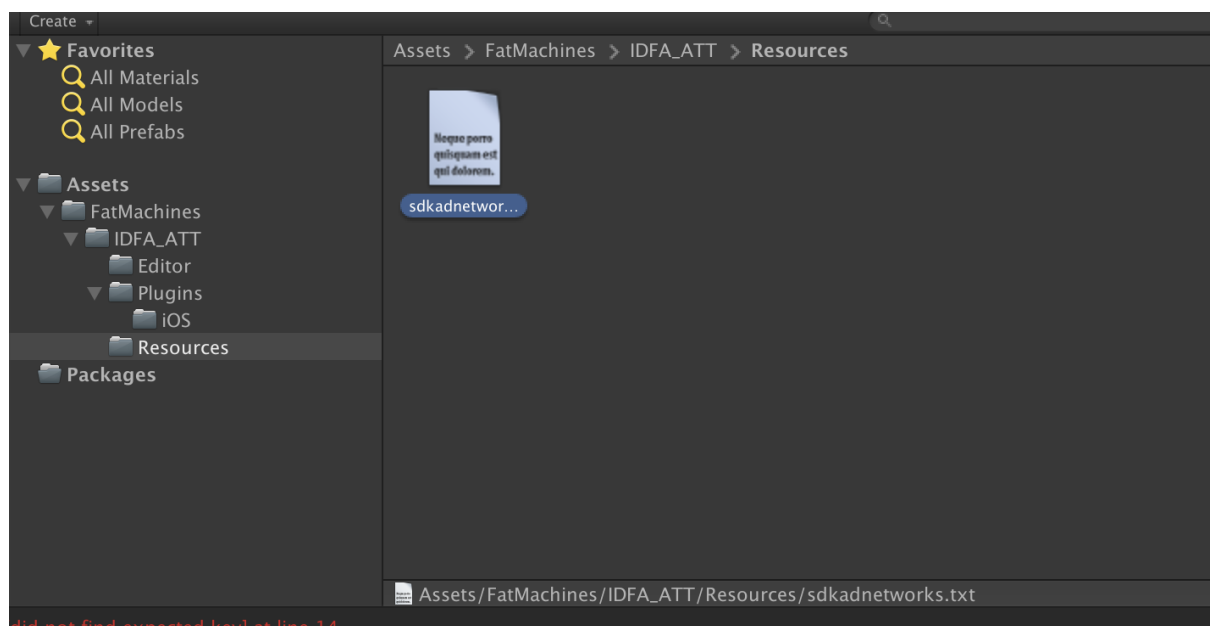

```
IDFA.RequestPopup();
```

To get status in callback in the same function call

```
IDFA.RequestPopup(status => {  
  
    Debug.Log(status);  
  
    attStatus.text = status.ToString();  
  
});
```

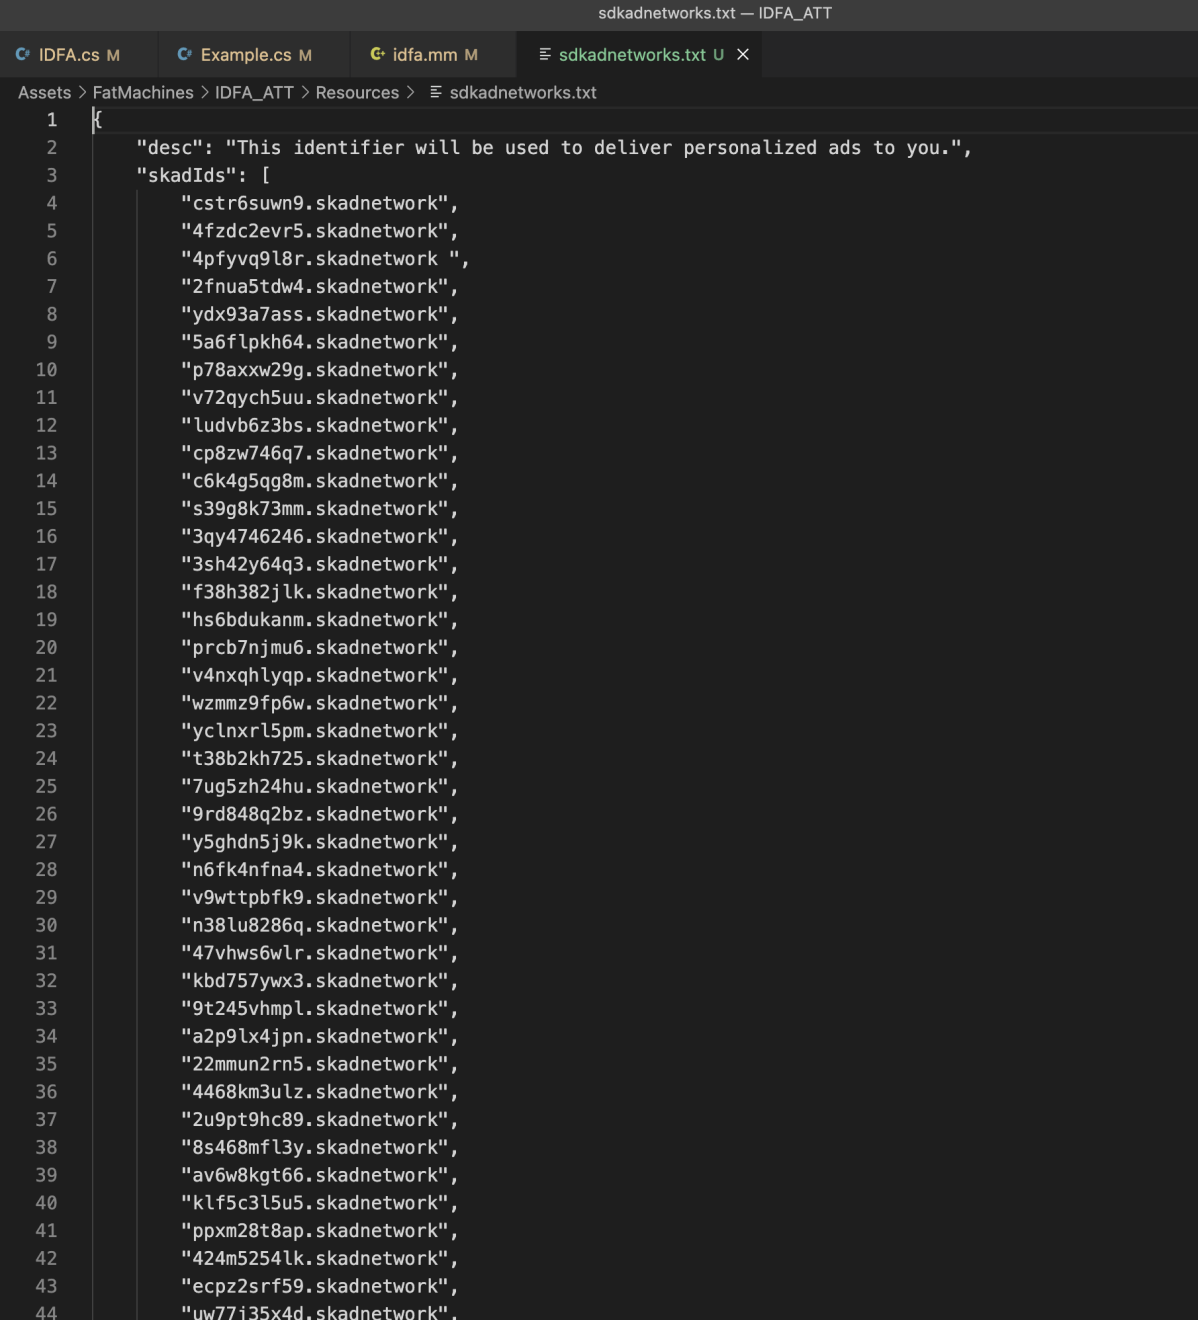

Step 2 (Add IDFA popup description and SKAdNetwork Ids)

There is a file sdkadnetworks.txt in the Resources folder

If you can't find the file, create a new file with the same name in a Resources folder. Do not change the name of this file.

In this file change/add or remove the ids you want. This is a JSON file. You can edit the description as well in the desc attribute.

```
sdkadnetworks.txt — IDFA_ATT
IDFA.cs M Example.cs M idfa.mm M sdkadnetworks.txt U X
Assets > FatMachines > IDFA_ATT > Resources > sdkadnetworks.txt
1 {
2   "desc": "This identifier will be used to deliver personalized ads to you.",
